Disable Driver Enforcement on 64-Bit Windows 8.1 or 10

To disable driver signature enforcement, we're going to need to get into the Troubleshooting options from the boot manager. The easiest way to bring this screen up is using a secret trick.

Simply select "**Restart**" from the power options menu (on Windows 8 that's under Charms or on the login screen, and in Windows 10 it's on the Start Menu).

Hold down the "**SHIFT key**" while you click "**Restart**".

Finally, you will be given a list of startup settings that you can change. The one we are looking for is “**Disable driver signature enforcement**”. To choose the setting, you will need to press the “**F7 key**”.

Startup Settings

Press a number to choose from the options below:

Use number keys or functions keys F1-F9.

- 1) Enable debugging
- 2) Enable boot logging
- 3) Enable low-resolution video
- 4) Enable Safe Mode
- 5) Enable Safe Mode with Networking
- 6) Enable Safe Mode with Command Prompt
- 7) Disable driver signature enforcement
- 8) Disable early launch anti-malware protection
- 9) Disable automatic restart after failure

Your PC will then reboot and you will be able to install drivers.

Thanks and Regards,

Robosoft Labs Team
